

Positive Substance

Use Screening:

RN WORKFLOW

Suicide and drug overdose are the leading causes of maternal mortality in Colorado.

YOUR ACTIONS SAVE LIVES

1

Identify a positive substance use screen

2

Document the positive screen and discuss with the patient

3

Call an interdisciplinary care team "time out" including:

- The patient
- Primary OB provider
- Pediatric provider
- Primary RN
- Charge RN
- Anesthesia
- Social worker

4

Initiate a social work consultation prior to discharge
