

12 Months Matters: Screen for OB Risks in the ED

Is your patient assigned female at birth and between the ages of 10 and 50?

Yes

ASK "Have you been pregnant within the past 365 days?"

Yes

THINK PREGNANCY

Consider the leading causes of pregnancy-related deaths when assessing this patient

- Suicide and unintended overdose
- Cardiac and Coronary Conditions
- Infection
- Thrombotic Embolism
- Hypertensive Disorders of Pregnancy
- Hemorrhage

Refer to your facility's clinical algorithms and protocols to help identify and treat a patient with an obstetric emergency
