

Overview

The NEST Resource Hub is a curated collection of practical, evidence-based resources to support safe sleep before discharge. It brings together trusted web resources, short videos, and caregiver-friendly materials to help answer common questions, navigate real-life challenges, and support families in creating a safer sleep environment at home. These resources are designed to complement the NEST toolkit and support consistent, family-centered care during the transition from hospital to home.

Safe Sleep for New Families

Resource Name	Description
