OUR WHY

We imagine a world where everyone has access to the healthiest pregnancy and delivery experience possible.

WHAT WE DO

We partner with Colorado healthcare providers, state agencies, insurers, and community groups to improve care for mothers and babies and prevent avoidable deaths and injuries.

OUR IMPACT

We drive statewide quality improvement across all 50 birthing hospitals, enhancing care in rural communities, and advancing policy change.

STRATEGIC PLANGOALS 2026-2030

Rural Perinatal Health

CPCQC will establish and sustain a network of partners supporting rural and hard-to-reach areas of Colorado, ensuring high-quality perinatal care for all families, regardless of race, ethnicity, or zip code.

Data Expansion

CPCQC will sustain a centralized data infrastructure to drive perinatal care quality improvement across Colorado, delivering timely insights, accessible data, and shared accountability for providers and policymakers.

Policy and Advocacy

CPCQC will implement a policy framework positioning us as a leading voice in perinatal health, unifying advocates to improve access, address preventable causes of mortality, and eliminate outcome disparities.

Sustained QI Initiatives

CPCQC will sustain full participation in hospital-based QI initiatives across all 50 Colorado birthing hospitals (per CO Rev Stat § 25-52-106.5), as well as expanding best practices across outpatient, prenatal, postpartum, and neonatal care settings.
